functional
ingredients

01

High Adehesion
(thin skin coverage)

Creates an even skin texture with a thin fit

A more sophisticated cover layer with a delicate touch

Cover Layer POINT

Micro Refining

Particles split once more for Thinner adhesion

Full-tension Layer

Tight coverage provided by a dense layer

Tallored Fitting

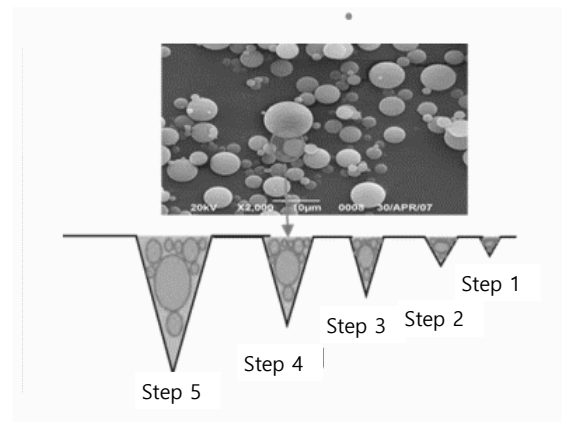

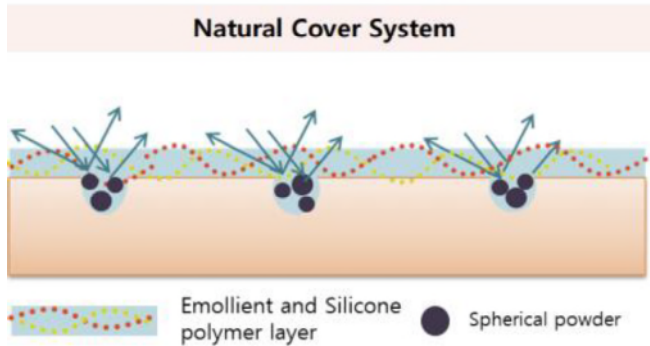

Adhere to flexible pores and irregularities

0
1

High
Adhesion
(thin skin
coverage)

Powders of various sizes fill thin wrinkles and wide pores evenly
to complete a smooth skin texture

One coat cover that does not require multiple taps

0
2

Long
Lasting
Effect

Persistence that protects from morning to evening without erasing

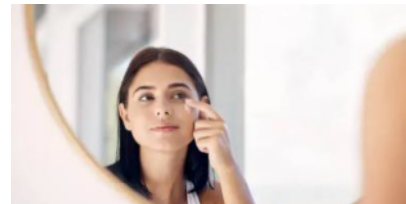

" ALL DAY LASTING "

Improve pigments and oils in a polymer network to increase uniform dispersion of contents and increase fixation and durability of makeup.

With a waterproof effect, it is not easily erased by stains or water.

After the contents settle on the skin, it blends with natural oil to maintain a more beautiful skin texture.

0
2

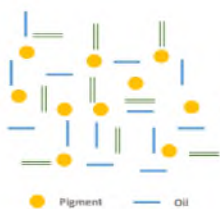

Long
Lasting
Effect

Complete immaculate skin with diffused reflection effect of spherical powder

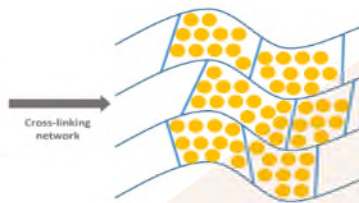

- Polymer film former evenly distributes pigment particles for thin adhesion without clumping

Cross-linking Network

[Before applying the film]
formerPigments and oils
float freely within the
formulation

[After applying the film]
formerImprisons pigments and oils in
a polymer network to increase
dispersibility and increase durability

Long
Lasting
Effect

After the contents settle on the skin, it blends with natural oil to maintain a more beautiful skin texture.

STAY
OVER

03
High
Functional
Ingredients

 Flower Complex

Contains 4 types of flower water that delivers cool and moist moisture to the skin

 6 Oil Complex

Contains oil extracted from seeds or seeds of 6 kinds of plants at 40 degrees for 8 hours to supply oil to the skin to increase moisturizing power

0
3

High
Functional
Ingredients

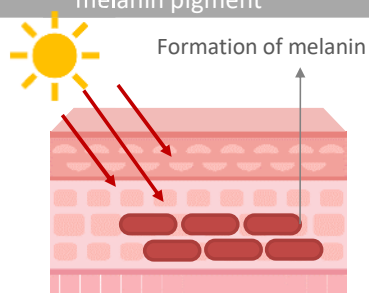

Adenosine

Contains adenosine to help improve skin wrinkles

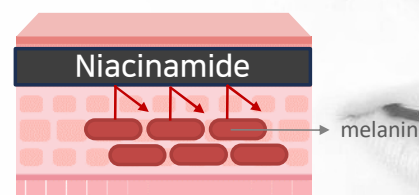

Contains niacinamide to help skin whitening

Formation of
melanin pigment

Melanin is a protective substance that prevents harmful UV rays from being absorbed into the body.

Niacinamide's
skin whitening principle

Suppresses the migration of melanin pigment and reduces the amount deposited on the epidermis
